

Prefilter

12,00 €*

*Recommended
retail price

The prefilter has been designed to attach on the drain of the washing machine or on the drain tap of the bucket where we are doing our extraction filtering possible impurities.

Fits any drain outlet and includes a safety lock to avoid any setback.

Laser cut, with triple reinforced stitching to increase its durability and heat resistant up to 225 °C. With convenient lock laces to facilitate its handling.

Rosin bags

5 units

20 Liters	25 €

Drying mesh

25 microns

20x20 cm	7 €
30x30 cm	10 €
50x50 cm	16 €

Extraction meshes made of 100% nylon filter food grade and unstained. The meshes, made of monofilament polyester, are a conical shape and all of them are filtering, from the bottom to the top so that facilitate water drainage, as they have been specifically designed to save time and labor to help making our extractions. Made from laser cut, with triple reinforced stitching to increase its durability and heat resistant up to 225 °C. Including practical locking laces to facilitate its use. All mesh sets include a 25 micron drying sieve, to dry your extractions optimally as well as a carrying bag. Available in different sizes and combinations.

Washing bags

20 Liters	30 €
8 Liters	20 €

Washing machine bag made 100% of nylon, food grade and undyed. With zip lock and safety closure, made from laser cut and triple reinforced seams to avoid losing any plant material. Heat resistant up to 225 °C. High durability.
